## TECHNICAL DATASHEET OF COMPUND

### ANTI-RUST PIGMENTS

#### WD-Z-3000

**Name:** Compound Anti-rust Pigments

**Components:** Calcium ion-exchanged anti-corrosive pigments

#### Main features:

Special treated, fine particle-sized gel silica.

Environment friendly.

Do not easy to delaminate.

Excellent workability.

long-lasting protection, great MEK resistant, etc.

#### Widely applicable

It is applicable for both solvent and water base paint.

#### Application

Coil coatings, including the primer, DTM system etc. Suitable for waterborne and solvent systems.

---

	Unit	Data
Appearance	/	White Powder
Oil Absorption DBP	g/100g	80~100
Particle Size (Malvern)	μm	2.8~3.2
Heating Loss (105℃, 2Hrs)	%	< 5
Ignition Loss (1000℃, 2Hrs)	%	< 8
pH	/	5~7
Surface Treatment	/	Special treatment

### Using Methods

Mix with binder, accessories, additive, solvent, and be dispersed while using.

### Packaging:

Double deck paper bag.

25 kg/ bag

10 t/ 20' FTP

### Storage:

Stored in dry and ventilated place.

Guarantee period is one year.
